# Jing: Upload Options + Embedding

This video can also be viewed on YouTube at:  
<http://www.youtube.com/watch?v=2Ivq0zPi-uU>

Click on the above image to view the video on YouTube....

- Upload the video to YouTube... or to ScreenCast if you want to limit access
- Share a link or embed the video
- Use for asynchronous discussions, lecturettes, or short tutorials.

# Jing Options

- Learn about customizing your Jing Buttons... to determine:
  - Where to upload (ScreenCast, YouTube, Flickr, etc)
  - Whether you want a link or the embed code

At: <http://help.jingproject.com/share/share-save-and-more.html>

After watching the short video, you are given to option to learn more:  
Choose 'Screencast.com' to find out how to get the embed code  
Choose 'YouTube' to find out how to upload directly to YouTube with the Pro version

# Highlights

- **Jing is great for short “casual” videos**
  - Under 5 minutes
  - No postproduction editing
  - Fast and easy to share video URL link or to embed video
- **Basic Version**
  - Free
  - Saves video as .swf (flash)
  - Includes 2GB of space on ScreenCast.com
- **Pro Version Also Includes**
  - Option to save as .mp4 (for smaller file size)
  - With a single click, can upload directly to YouTube

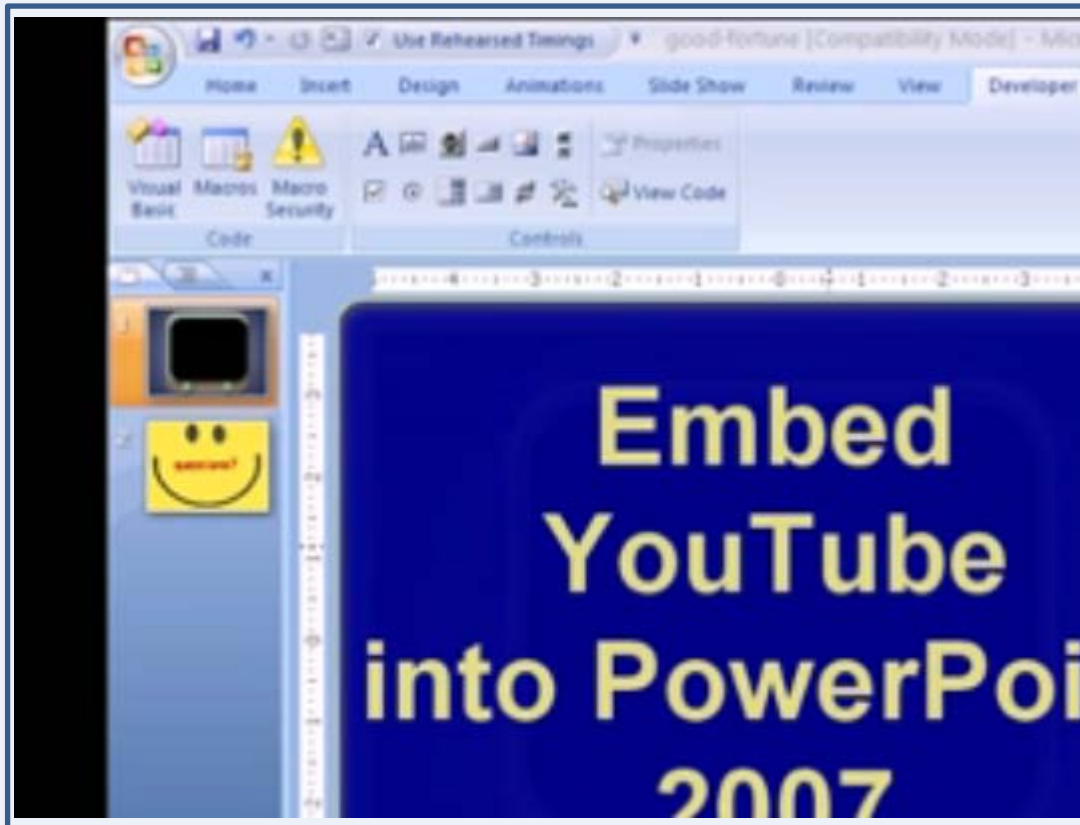

# Appendix A: Recording Tips

- Get a good headset. Logitech is fine, but using one where the wiring is fully encased (shielded, like coaxial cables) is even better.
- Make sure to select the *correct* microphone to use... prior to starting your recording (e.g., some people have a web cam microphone, a headset microphone, etc)
- Remove the typical reason for a background static noise in video recordings... Keep the microphone/headset away from power sources or cords carrying electricity. Unplug, turn off, keep away from power sources when possible (e.g., on a laptop – unplug laptop and run off the battery).

Summary of tips provided  
by Julie Harland

# Appendix B: Embed Video into PPT

This video can also be viewed on YouTube at:  
<http://www.youtube.com/watch?v=A1jw8O0z4S0>
